

# Rexnord Omega<sup>®</sup> HDY

## Features

- ▶ Split in half element
- ▶ Interchangeable hubs
- ▶ HDY design

## Benefits

- ▶ Ease of installation
- ▶ Visual inspection
- ▶ Low inventory requirements
- ▶ Smaller coupling size
- ▶ Higher torque ratings

## HDY

Finished bore hub

Taper bush hub

Torque Demands Driven Machine

Typical Application for Electric Motor or Turbine Driven Equipment

Typical Service Factor

	Constant torque such as centrifugal pumps, blowers and compressors	1.0
	Continuous duty with some torque variations including plastic extruders and forced draft fans	1.5
	Light shock loads from metal extruders, cooling towers and log haulers	2.0
	Moderate shock loading as expected from a car dumper, stone crusher, vibrating screen	2.5
	Heavy shock load with some negative torques from reciprocating pumps, compressors, reversing turnout tables	3.0
	Frequent torque reversals such as reciprocating compressors with frequent torque reversals which do not necessarily include reverse rotations	Consult Rexnord Engineering

\* Weight and inertia with maximum bore and key way • Dimension C(1) finished bore hubs - C(2) with Taper Bush hubs

\*\* Please consult Rexnord or Taper bush provider to ensure Taper bush Tnom is greater than coupling Tnom
